Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Arguments

Applicant's arguments with respect to all the pending claims have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 4-8 and 13-15 are rejected under 35 U.S.C. 102(^e~~b~~) as being anticipated by Hakim (6647828).

As to claim 1, disclosed a device capable of scraping sweat from an animal ("adapted to scrape sweat" is intended use and the device of Hakim is capable of performing the claimed function) comprising a core made of a first resilient material (col. 2, lines 44-47); defining an elongated curved blade (38) that is capable of scraping sweat and debris from an animal; a handle (18) extending from one end of the blade; a sheath (26) made of a second resilient material provided on said core and along a length of the blade; and the first material (polypropylene) is less resilient than the first (Kraton).

As to claim 4, disclosed is a polymer.

Art Unit: 3644

As to claim 5, disclosed is polypropylene.

As to claim 6, disclosed is a polymer (Kraton).

As to claim 7, disclosed is a rubber (Kraton).

As to claim 8, disclosed is silicon (col. 2, lines 65).

As to claim 13, disclosed is an elongated trough shaped blade (fig. 6a).

As to claim 14, disclosed is an interlock formed between the scraper and the sheath (fig. 6a).

As to claim 15, disclosed is a tongue and groove (fig. 6a).

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 9-12 rejected under 35 U.S.C. 103(a) as being unpatentable over Hakim (6647828).

Art Unit: 3644

As to claim 9, not disclosed is the device mad of monomer rubber. It would have been obvious to one having ordinary skill in the art at the time the invention was made to comprise the device of a monomer rubber; since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice.

As to claim 10, not disclosed is a vulcanate. It would have been obvious to one having ordinary skill in the art at the time the invention was made to comprise the device of a vulcanate; since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice

As to claim 11, not disclosed is a monomer rubber and a polymer. It would have been obvious to one having ordinary skill in the art at the time the invention was made to comprise the device of a monomer rubber and a polymer; since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice.

As to claim 12, not disclosed is monomer rubber and a polypropylene. It would have been obvious to one having ordinary skill in the art at the time the invention was made to comprise the device of a monomer rubber and a polypropylene.; since it has been

Art Unit: 3644

held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
